

SONIE E

Cloud DevOps Engineer

Chennai, TamilNadu, India | +91 7358864319 | sonie03.mail@gmail.com | <https://www.linkedin.com/in/sonie-e-812917139/>

PROFESSIONAL SUMMARY

Cloud DevOps Engineer with 7.3 years of total IT experience, including 4.2 years in Cloud DevOps and 3.1 years in Application Support within Banking & Financial Services. Skilled in designing and maintaining CI/CD pipelines using Jenkins, GitHub Actions, and Azure DevOps; deploying containerized workloads with Docker and Kubernetes on Amazon EKS and Azure Kubernetes Service (AKS); and provisioning cloud infrastructure as code with Terraform and Ansible. Experienced managing core AWS services (EC2, S3, IAM, VPC, RDS, EKS, ECS, CloudFront, SNS) and Microsoft Azure services (Virtual Machines, AKS, Blob Storage, Azure AD, Azure Monitor, ARM Templates), including secure network architecture design (VPC, subnets, NAT/Internet Gateways), and driving observability with CloudWatch, Prometheus, Grafana, Splunk, and New Relic. Strong track record in release management, production deployment support, and incident/root-cause resolution within Agile teams delivering secure, scalable, high-availability enterprise banking applications.

CORE COMPETENCIES

CI/CD & Deployment Automation • Container Orchestration (Kubernetes/EKS) • Infrastructure as Code (Terraform, Ansible) • AWS Cloud Infrastructure Management • Cloud Network Security (VPC, Subnets, NAT/Internet Gateway) • Monitoring & Observability • Release & Change Management • Incident & Problem Management (RCA) • Agile/Scrum Delivery • Shell/Bash Scripting • Production Support & SLA Compliance

TECHNICAL SKILLS

Cloud Platform: AWS (EC2, S3, IAM, VPC, Subnets, NAT Gateway, Internet Gateway, RDS, EKS, ECS, CloudFront, SNS), Microsoft Azure (Virtual Machines, AKS, Blob Storage, Azure AD, Azure Monitor, ARM Templates).

CI/CD Tools: Jenkins, GitHub Actions, Azure DevOps

Containerization & Orchestration: Docker, Kubernetes (Amazon EKS)

Infrastructure as Code: Terraform, Ansible

Cloud Networking & Security: VPC Design, Public & Private Subnets, NAT Gateway, Internet Gateway, Route Tables, Security Groups, NACLs

Monitoring & Observability: AWS CloudWatch, Prometheus, Grafana, Splunk, New Relic

Version Control: GitHub, Git

Scripting: Shell, Bash

Database: MySQL | **Operating System:** Linux | **Methodology:** Agile/Scrum

PROFESSIONAL EXPERIENCE

ThoughtProcess SoftTech Private Limited, Hyderabad — Software Engineer Oct 2025 – Present

(Cloud DevOps Engineer)

Environment: AWS (EKS), Azure (AKS, Azure DevOps), Jenkins, Kubernetes, Terraform, Ansible, Splunk, New Relic, Shell Scripting

- Manage and troubleshoot Jenkins CI/CD pipeline status, ensuring reliable and repeatable build/deployment execution.
- Deploy and scale containerized applications on Amazon EKS using Kubernetes.
- Provision and update AWS infrastructure using Terraform, maintaining configuration consistency across environments.
- Configure CloudWatch alarms and dashboards to strengthen infrastructure monitoring and proactive alerting.
- Monitor application health and performance using Splunk and New Relic; support on-call rotations for production incident response.
- Automate repetitive operational tasks using Shell scripting and Ansible, reducing manual intervention.
- Manage GitHub repositories and review pull requests for infrastructure code changes.
- Participate in Agile ceremonies and release activities across cross-functional teams.
- Provision and manage Microsoft Azure resources, including Azure Kubernetes Service (AKS) clusters and Azure DevOps pipelines, to support containerized workload deployments alongside AWS EKS.
- Leveraged AI-assisted tools (GitHub Copilot/ChatGPT) to generate and optimize Terraform and Ansible scripts, accelerating infrastructure-as-code development and reducing manual coding effort.
- Applied AI-driven log analysis and anomaly detection to correlate Splunk/New Relic alerts, speeding up root-cause identification and reducing mean time to resolution for production incidents.

Capgemini India Pvt. Ltd. — Consultant, Cloud DevOps Engineer Jun 2022 – Oct 2025

Client: Synchrony Bank | Project: Enterprise Card Services Platform | Domain: Banking & Financial Services

- Developed and maintained CI/CD pipelines using Jenkins and GitHub Actions, standardizing build and deployment automation across multiple environments.
- Built Docker images and deployed containerized applications to Amazon EKS, managing Kubernetes Deployments, Services, ConfigMaps, and Secrets.
- Provisioned and maintained AWS infrastructure using Terraform across EC2, S3, IAM, VPC, RDS, EKS, ECS, CloudFront, and SNS.
- Designed and implemented secure Amazon VPC architecture with public and private subnets across multiple Availability Zones to isolate application, database, and management tiers for a banking workload.
- Configured Internet Gateways for public-facing resources and NAT Gateways to enable secure outbound internet access for private-subnet resources, reducing direct internet exposure of backend systems.
- Defined and maintained route tables, Security Groups, and Network ACLs to enforce least-privilege network access and segment traffic between public, private, and database subnet tiers.
- Implemented VPC endpoints and peering connections to enable secure, private connectivity between AWS services and hybrid environments without traversing the public internet.
- Implemented monitoring and dashboards using AWS CloudWatch, Prometheus, and Grafana, improving visibility into application and infrastructure health.
- Performed log analysis using Splunk and application monitoring via New Relic to accelerate root-cause identification.

- Automated operational workflows with Shell/Bash scripts, reducing manual deployment steps and turnaround time.
- Led production deployment validation and rollback activities, safeguarding platform stability during releases.
- Collaborated with development, QA, and infrastructure teams in an Agile/Scrum environment to deliver secure, compliant Credit Card, Debit Card, Customer Account, and Transaction Processing capabilities.
- Maintained deployment runbooks and operational documentation, supporting SLA compliance during production incidents.
- Provisioned and managed Microsoft Azure infrastructure, including Virtual Machines, Azure Kubernetes Service (AKS) clusters, Blob Storage, and Azure Active Directory, to support hybrid cloud deployments for banking applications.
- Automated infrastructure provisioning and release pipelines using Azure DevOps and ARM Templates, and configured Azure Monitor dashboards to extend observability across hybrid AWS/Azure environments.

Capgemini India Pvt. Ltd. — Senior Software Engineer, Application Support Engineer

May 2019 – May 2022

Client: Synchrony Bank | Project: Consumer Credit Card Origination Platform | Domain: Banking & Financial Services

- Monitored application health and system availability for a high-volume credit card origination platform integrated with retail partners (Amazon, Walmart).
- Investigated and resolved production incidents within SLA timelines; conducted root cause analysis (RCA) for critical issues.
- Analyzed application logs using Splunk and New Relic to diagnose and resolve performance and functional issues.
- Managed incident, problem, and change management tickets, coordinating with development teams for timely resolution.
- Performed batch monitoring, health checks, and operational support across production environments.
- Maintained support documentation and procedures, improving consistency of incident response.

ACHIEVEMENTS

- Contributed to CI/CD automation initiatives that improved deployment efficiency and consistency across environments.
- Supported multiple production releases for a banking platform with minimal downtime.
- Strengthened monitoring visibility using CloudWatch, Prometheus, Grafana, Splunk, and New Relic.
- Recognized for effective cross-functional collaboration across development, QA, and infrastructure teams in Agile delivery.

EDUCATION

- **MBA (Distance Education), General Management** — College of Engineering, Guindy, Anna University — 2022
- **B.Sc. Mathematics with Computer Applications** — Hindusthan College of Arts and Science, Bharathiar University — 2019
