PROFESSIONAL SUMMARY

Results-driven Cloud DevOps Engineer with over 6.5 years of IT experience (3.5+ years in Cloud DevOps and 3 years in Application Support) within the Banking & Financial Services sector. Proven expertise in architecting, automating, and maintaining CI/CD pipelines, deploying containerized microservices via Docker and Kubernetes (Amazon EKS), and provisioning scalable AWS infrastructure using Terraform. Adept at driving operational excellence through comprehensive observability (Prometheus, Grafana, Splunk) and collaborating across Agile teams to deliver secure, highly available, and reliable enterprise banking solutions.

TECHNICAL SKILLS

Cloud Platform: AWS (EC2, S3, RDS, CloudFront, VPC, IAM, EKS, ECS, SNS)

CI/CD & Version Control: Jenkins, GitHub Actions, GitHub

Containerization & Orchestration: Docker, Kubernetes (Amazon EKS)

Infrastructure as Code (IaC): Terraform

Monitoring & Observability: Splunk, New Relic, AWS CloudWatch, Prometheus, Grafana

Scripting & Databases: Shell, Bash, MySQL

PROFESSIONAL EXPERIENCE

**Capgemini India Pvt. Ltd. — Cloud DevOps Engineer
(Consultant)**

*June 2022 – October
2025*

Client: Synchrony Bank | Project: Enterprise Card Services Platform

- **CI/CD & Automation:** Architected and maintained robust CI/CD pipelines utilizing Jenkins and GitHub Actions, streamlining build, testing, and deployment workflows across multiple environments.
- **Infrastructure as Code:** Provisioned and managed secure, scalable AWS infrastructure elements (EC2, VPC, IAM, RDS) utilizing Terraform.
- **Container Orchestration:** Orchestrated containerized application deployments into Amazon EKS, effectively managing Deployments, Services, ConfigMaps, and Secrets for zero-downtime rollouts.
- **Scripting & Optimization:** Developed custom Shell and Bash scripts to automate repetitive operational tasks, significantly reducing manual intervention and deployment times.

- **Observability & Reliability:** Implemented comprehensive monitoring solutions using Prometheus, Grafana, and AWS CloudWatch. Performed deep log analysis via Splunk and New Relic to proactively identify bottlenecks and ensure strict SLA compliance.
- **Agile Collaboration:** Collaborated closely with development, QA, and infrastructure teams in Agile/Scrum ceremonies to execute seamless production rollouts, validate deployments, and manage operational runbooks.

Capgemini India Pvt. Ltd. — Application Support Engineer May 2019 – May 2022

Client: Synchrony Bank | Project: Consumer Credit Card Origination Platform

- **Incident & Problem Management:** Directed L2/L3 application support for a critical credit card origination platform, investigating and resolving complex production incidents within stringent SLA timelines.
- **Root Cause Analysis (RCA):** Conducted thorough RCA for critical incidents, spearheading incident, problem, and change management ticket workflows.
- **Application Monitoring:** Leveraged Splunk and New Relic for comprehensive application log analysis, executing proactive health checks and batch monitoring.
- **Cross-functional Coordination:** Coordinated seamlessly with development teams and business users for issue resolution, release validation, and production deployment support.
- **Documentation:** Authored and maintained detailed operational documentation, support procedures, and runbooks to streamline team onboarding and troubleshooting.

EDUCATION

MBA (General Management)

Anna University, Guindy (August 2022)

B.Sc. Mathematics with Computer Applications

Hindusthan College of Arts and Science / Bharathiar University (April 2019)

KEY ACHIEVEMENTS

- Recognized for pivotal contributions to CI/CD automation initiatives, driving substantial improvements in deployment efficiency and release consistency.
- Successfully supported multiple high-stakes production releases with minimal to zero application downtime.
- Played a key role in modernizing legacy workflows through infrastructure automation using Terraform and Kubernetes.
